

# EASY FLOW<sup>®</sup> WITH 3E

## USING LIGHT AND CATTLE BEHAVIOUR TO YOUR ADVANTAGE

Cattle naturally follow light when placed in an enclosed area. By strategically designing equipment that draws cattle in the right direction using light, cattle movement through the handling system is greatly improved.

### ALL ABOUT EASY ENTRY AND EXIT

#### NEW REMOVABLE PANELS

- Allow handlers to customise sheeting
- Control the amount of light and open space seen by cattle

#### CRADLE-STYLE RACES

- Side panels narrow down in the lower area
- Prevents cattle from turning around

#### REDUCED FOOT TRAPS

- Lowered bottom bars upon entry and exit
- Side panels are sheeted to the ground
- Bolt-together races

### LOW-STRESS CATTLE HANDLING FOR EASY FLOW<sup>®</sup>

- Modifying the sheeting height to your preference allows for easy application of point of balance and pressure zone handling techniques to regulate flow.

#### OTHER PRODUCTS THAT FEATURE THE 3E SYSTEM

- All 400 and 700 Series cattle crushes
- All 700 Series mobile handling systems
- BudFlow<sup>®</sup> cattle forcing pen
- Q-Catch<sup>®</sup> 74 Series Mobile Cattle Crush, Race & Forcing Pen
